

```
1 namespace CSharp;
2 class LinqTest
3 {
4     public static void Main()
5     {
6         // Data source
7         string[] names = { "Bill", "Steve", "James", "Mohan" };
8
9         // LINQ Query
10        var query = from name in names
11                    where name.Contains ("e")
12                    select name;
13
14        // Query execution
15        foreach (var name in query)
16            Console.WriteLine(name + " ");
17        //Console.WriteLine(myLinqQuery);
18    }
19 }
```
