

Income & Expense Tracker Desktop Application with Update, Delete, and Totals

Objective:

Create a desktop application where a user logs in with fixed credentials, can add income and expense records, view them separately, search by description, update or delete entries, and see the total income and expense amounts.

Features

1. Login Screen

- Username: admin
- Password: password123
- Show an error message for incorrect credentials.
- On successful login, navigate to the main window.

2. Main Window

The Main Form should contain the following sections.

MenuStrip

Create the following menu:

File

- Import Records
- Export Records
- Exit

Transaction (No Sub Menu Open Window and do Add/Update/Delete)

View

- Show All (ListView)
- Show Income
- Show Expense
- Summary Total Income, Expense and Balance using Progress bar (Month wise)
- Graph Total Income, Expense and Balance using PictureBox (Month wise)

Settings

- Change Font
- Change Color

Control	Where to use in this project	Purpose
NumericUpDown	Amount field	Enter income/expense amount with minimum/maximum limits and decimal support.
DomainUpDown	Month / Year selection or Record ID navigation	Allows the user to move through predefined values, e.g. months: January, February, March...
ProgressBar	Budget/Expense progress	Summary Total Income, Expense and Balance using Progress bar (Month wise)

DateTimePicker	Date field	Select the transaction date. The specification says the date should default to today's date.
PictureBox	Login/Main Form	Income / Expense Graph
ListBox	Expense category	Show predefined categories(as per type of transaction used by RadioButton) such as Food, Travel, Salary, Rent, Shopping.
ListView	Transaction records	Display ID, Date, Description, Type and Amount in Details view. The specification requires these columns and selection for update/delete.
GroupBox	Income/Expense Input	Group Date, Description, Type and Amount controls together.
ComboBox	Income Category	Category of Income as per type of transaction used by RadioButton
RadioButton	Type	Options such as Income / Expense . Based on this show Combobox or Listbox
CheckBox	Optional category/status features	In the Income , Expense report chose category filters.
MenuStrip	Application menu	Menus such as File → Import, Exit; Records → Add, Update, Delete; View → All, Income, Expense.Summary,Graph ; Settings: Change Font, Change Color
OpenFileDialog	Import records	Allow users to import a CSV in a project.
SaveFileDialog	Export records	Allow users to export data to a CSV.
FontDialog	Display customization	Let the user change the font of the ListView and Gridview or application display.
ColorDialog	Display customization	Allow the user to choose text colors for the ListView and Gridview.
